Business: The company's principal activity is that of a development stage enterprise. It was formed to be a direct sales marketing company to distribute natural health products via the Internet. The company abandoned this business plan in 2001 without undertaking any operation and its activities have been limited to its formation and the raising of equity capital. Bluesky is a steel fabrication company that fabricates heavy steel girders for hi-rise construction projects, lightweight steel buildings and bridges.

Business: The group's principal activities are to design, manufacture and market a diverse mix of sportfishing boats under the jupiter name. The outboard product line consists of four outboard powered center console models: 31' open center console, 31' cuddly cabin, 31' forward seating centre, 27' open center console and 27' console-berth model. The inboard models include a completely redesigned 35 foot flybridge convertible as well as a 38 foot flybridge convertible. The inboard boats are primarily used for fishing and fishing related activities and they also serve as cruising vessels. The outboard powered product lines deep-v hulls are specifically designed to perform at high speeds in offshore sea. There is no lean or cavitation in a turn. The group's principal offices and manufacturing facilities are located in port everglades. The boats are sold to authorized dealers in the United States along the east coast and gulf of Mexico, as well as Puerto Rico.

Business: The group's principal activities are to license its music catalog internationally and market entertainment products through retail and direct response marketing channels in the United States and Europe. It operates through two segments: music and licensing. The music segment consists primarily of the sale of pre-recorded music both from the group's music master catalog and under licenses obtained from other record companies. The group sells compact discs and DVD's directly to retailers, wholesalers and rack service distributors, who stock and manage inventory within music departments for retail stores. In the licensing segment, the group licenses the rights to its master music catalog to third parties worldwide for use in albums, films, television programs and commercials. The customers of the group include retailers, wholesalers and rack service distributors. The group operates in the United States and Europe.

Business: The group's principal activities are to design, manufacture, market and service gravimetric and volumetric feeders, pneumatic conveying systems and related equipments. These equipments are used for handling bulk solids in industries such as plastics, food, chemical, pharmaceutical, cement and other manufacturing industries. The group operates through two business units: feeder group and pneumatic conveying group. The feeder group produces feeders that control the flow of materials into a manufacturing process by mass or weight (gravimetric) or by volume (volumetric feeding). The pneumatic conveying group integrates two brand names, pcs and colormax and the manufacturing of hurricane product line into one business group. The group operates in United States, Canada, Europe, the Middle East, Africa and Asia. On 02-Jan-2003, the group acquired Pennsylvania Crusher Corporation & Jeffrey Specialty Equipment Corporation.

Business: The group's principal activities are mining and refining of bauxite into alumina, production of primary aluminum and manufacture of fabricated aluminum products. The group operates in three operating segments of aluminum industry and commodities marketing and corporate segments. The aluminum industry segments include: alumina and bauxite, primary aluminum and fabricated products. The alumina and bauxite business unit's products are smelter grade alumina and chemical grade alumina hydrate. The primary aluminum business unit produces commodity grade products as well as value-added products such as rod and billet. The fabricated products group sells value-added products such as heat treat aluminum sheet and plate used in the aerospace and general engineering markets. The commodities marketing segment includes the results of the company's alumina and aluminum hedging activities.

Business: The group's principal activity is to provide rail transportation services. The group owns and operates rail network comprised of approximately 6,000 miles of main and branch lines that link key commercial and industrial markets in the United States and Mexico. The group offers services to a wide range of industries including the chemical and petroleum, paper and forest, agricultural and mineral, intermodal and automotive and coals. The group's expanded rail network interconnects with all other class I railroads and provides customers with an effective alternative to other railroad routes, giving direct access to Mexico and the southeastern and southwestern United States.

Business: The group's principal activities are the construction of single-family homes, high-density residential properties, such as condominium complexes and commercial projects. The group operates through two segments: construction operations and mortgage banking services. Construction operations include the acquisition and development of land primarily for residential purposes and offer a variety of homes that are designed to cater first-time, move-up and active adult homebuyers. The mortgage banking service provides mortgage banking service primarily to the group's domestic homebuyers. It originates, processes and sells mortgages to third-party investors. The group operates in Arizona, Nevada, New Mexico, Colorado, Illinois, Texas, Florida, Georgia and carolina and international operation in France. On 06-Mar-2003, the group acquired colony homes, on 04-Sep-2003, zale homes and on 06-Jan-2004, palmetto traditional homes.

Business: The group's principal activity is to design and develop absorbable biomaterial products for the orthopaedic, cardiology, drug and biologics delivery and wound care markets. The group has developed the triactiv(tm) balloon protected flush extraction system, a device designed to provide distal protection during saphenous vein graft treatment. The group has also developed the angio-seal(R) vascular closure device, which is used in sealing arterial punctures created during common cardiovascular catheterization procedures such as diagnostic angiography, balloon angioplasty and stenting. Angio-seal(R) vascular closure device is currently marketed, manufactured and distributed by St. Jude Medical under a license agreement.

Business: The group's principal activities are to acquire, develop and commercialize novel pharmaceutical products for the treatment of life-threatening diseases including diabetes and cancer. It has two product candidates, krx-101 and krx-0401 in late-stage clinical development. Krx-101 (sulodexide) is a novel oral heparinoid compound for the treatment of diabetic nephropathy, a kidney disease caused by diabetes. Krx-0401 (perifosine) is the prototype of a new group of anti-cancer drugs. Additionally, the group is developing three clinical stage oncology compounds namely: krx-0401, krx-0402 and krx-0403. It also has an active in-licensing and acquisition program designed to identify and acquire clinical-stage drug candidates. On 06-Feb-2004, the group acquired access oncology inc.

Business: The group's principal activities are to develop and deliver various technology and service solutions to the electric power generation industry. The group facilitates in the various air quality emission standards and to lower the cost of producing electricity. The technology solutions enhance the output of coal, gas and oil-fired electric utility boilers. The group develops patented technology, that uses heat and pressure to physically and chemically transform high-moisture, low-energy value coal and other organic feedstock into a low-moisture, high-energy solid clean fuel.

Business: The group's principal activity is to manufacture and market micro-cellular polyurethane tires. The industries served by the group include lawn and garden, health and wellness, industrial, and sports and recreation. The group manufactures polyurethane tires by blending hydrocarbon-based quality isocyanate intermediates with glycol-based polyols and other chemicals. The resulting compound makes a light but tough tire. The group also manufactures non-tire urethane products, for non-tire customers.

Business: <http://www.kimberresources.com/> The principal activity of this company is the development and exploration of gold and silver in Sierra Madro gold belt of Mexico. The company controls 28,000 hectares in Chihuahua State. The company has been active on the property for four years after first acquiring an option to purchase 100% ownership of the original concessions, free of any royalty. The company's current project is Monterde property, which is currently being developed and a pre-feasibility study expected in 2006. The deposit is open to the northeast, southeast, and at depth with further exploration and development drilling is ongoing. The company had shifted a major part of its drilling budget to the search for additional deposits on the Monterde. The company's additional exploration targets have been identified but not yet named and will be subject to further mapping, sampling and trenching. The company went public by way of an IPO in June 2002. The company's head office is located in Vancouver, British Columbia.

Business: The group's principal activities are classified into three business segments: the aerisys division, the Paris division and the hboa division. The aerisys division markets and sells the aerisys intelligent community(tm) to schools. The aerisys intelligent community(tm) is a Web-based software program and private, browser-based intranet that allows schools to collaborate with parents and faculty each day on classroom homework, assignments, critical dates, team priorities and school news in a private forum. The Paris division owns a membership interest in Paris health services, Ltd. The Paris division is an outsourcing service that will assist the hospitals in obtaining the pre-approvals from the insurers. The hboa division provides an online community with business tools and fee-based services for small and home based businesses.

Business: The group's principal activities are to provide airfreight services to freight forwarders who transport the freight to and from our cargo facilities in the origin and destination cities through its wholly owned subsidiaries. The group also arranges for the pick up from shippers and final delivery to recipients. Through Kitty Hawk Cargo, Inc., the group operates independent city-to-city expedited scheduled freight network in 50 cities in the United States and one city in Canada providing next-morning, two-day and three-day delivery services. Through Kitty Hawk Airco, Inc., the group provides airfreight transportation services in North America using owned or leased boeing 727-200 freighter aircraft. These services are provided under contractual arrangements. Scheduled freight network accounted for 96% of 2003 revenues and cargo airline, 4%.

Business: The group's principal activity is to produce carbon compounds and treated wood products for use in a variety of markets including the railroad, aluminum, chemical, utility and steel industries. The group has two segments namely carbon materials and chemicals and railroad and utility products. The carbon materials and chemicals division manufactures carbon pitch, phthalic anhydride, cresote, carbon black and furnace coke. The railroad and utility products division provides various products and services to railroads, including crossties, track and switch pre-assemblies and disposal services. This segment supplies treated wood poles to electric and telephone utilities and provides wood treating services for vineyards, construction and commercial applications. The group operates 37 facilities in the United States, Australia, New Zealand, Europe and South Africa.

Business: The group's principal activity is to provide recruitment and leadership development services. The group operates in two segments, namely executive recruitment and future step. The executive recruitment segment offers recruitment services at board level and for chief executive and other senior executive positions. These services are offered to clients in the advanced technology, consumer goods, industrial, financial services, healthcare and professional services industries. The middle-management recruitment segment named futurestep, offers services for middle and lowers management positions with annual compensation between \$75,000 to \$150,000. It also offers project recruitment and managed services. In addition to these, the group provides management assessment and executive coaching services. It operates in North America, Europe, Asia/pacific and South America.

Business: The group's principal activity is to develop proprietary prescription products for the treatment of chronic cardiovascular and respiratory diseases. The group also conducts research on novel solid-dose drug delivery systems. Its products niaspan(R) and advicor(R) are niacin/lovastin-based medications used for the treatment of mixed lipid disorders. The cardiovascular products under development consist of controlled-release, once-a-day and oral dosage formulations. The respiratory products under development consist of aerosolized inhalation formulations to be used with the proprietary inhalation devices. The group has signed an exclusive international agreement with merck kgaa to market the niaspan and advicor products outside the United States, Canada and Japan. In the United States, the company owns 58 patents.

Business: The group's principal activity is to operate retail food and drug stores, multi-department stores, jewelry and convenience stores in the midwestern, southern and western portions of the United States. As of 14-Aug-2004, the group operated, either directly or through our subsidiaries, 2,530 supermarkets. In addition to supermarkets, it operates 802 convenience stores and 440 fine jewelry stores. Supermarkets are generally operated under one of the following formats: combination food and drug stores ('combo stores'); multi-department stores; or price impact warehouse stores. The convenience stores offer a limited assortment of staple food items and general merchandise and sell gasoline. The group's brand products are produced and sold in three quality 'tiers': 'private selection', 'banner brand' (kroger, ralphs, king soopers, etc.) and fmv (for maximum value). The group operates solely in the domestic market.

Business: The group's principal activity is to develop and commercialize new, proprietary air movement and purification technology known as kronos (TM) devices. The product has the ability to provide silent, energy efficient, clean air to applications ranging from standalone consumer devices, to havoc systems, to industrial scrubbers. The group's activity is divided into six distinct market segments such as air movement and purification, air purification for unique spaces, specialized military, embedded cooling and cleaning, industrial scrubbing and hazardous gas destruction. Air movement and purification segments includes health care, hospitality, residential and commercial facilities. Air purification for unique spaces includes clean rooms, automotive, cruise ships and airplanes. Specialized military segment includes naval vessels, closed vehicles and environmental devices. Embedded cooling and cleaning includes electronic devices and medical equipment.

Business: The group's principal activity is to design, manufacture and market capital equipment, packaging materials and test interconnect solutions and services. The group manufactures a line of bonding wire and wire bonders that are used on an integrated circuit package. It also manufactures fixtures that are used for connecting automatic test equipment to the semiconductor device under test during wafer fabrication. The group's flip chip business unit licenses its flip chip technology and provides flip chip bumping and wafer level packaging services. The group caters to the companies that manufacture and assemble semiconductor devices. Major customers include advanced micro devices, advanced semiconductor engineering, chippac, general dynamics and other semiconductor manufacturers that primarily operate in the Asia/pacific.

Business: The group's principal activities are to develop, manufacture and market satellite communications products for the automotive, recreational vehicle and marine markets, and navigation, guidance and stabilization products for defense markets. The products enable customers to receive live digital television, telephone and Internet services in their automobiles, recreational vehicles and marine vessels while in motion. The defense products include tactical navigation systems that provide uninterrupted navigation and pointing information in a broad range of military vehicles, including humvees and light armored vehicles. The group also offer precision fiber optic gyro-based systems that help stabilize platforms such as gun turrets and radar units and also provide guidance for munitions. The products of the group are tacnav(tm),tracvision(R) and traphone(r). The products are sold in the United States, Canada and European countries.

Business: The group's principal activity is to develop medical devices to restore spinal anatomy using minimally invasive technology. The group's products include bone access systems, inflatable bone tamp, inflation syringe, bone filler device, bone biopsy device and curette. The group's products are primarily used by surgeons to repair compression fractures of the spine caused by osteoporosis and cancer. The group markets its instruments to physicians who perform spine surgery, including orthopedic spine surgeons and neurosurgeons in the United States, Europe, South Korea and China. As of 31-Dec-2003, the group has trained 3,900 physicians in the use of its kyph instruments and these physicians have used these instruments in over 60,000 spine surgeries. The group acquired sanatis gmbh in feb 2003.
