**Business:** The group's principal activity is to supply broadband wireless access equipment to service providers such as Internet service providers and other telecommunications users. These systems enable communication service providers to deliver integrated high-speed data and voice services. The systems are based on the direct sequence code division multiple access technology which provides wide area coverage, security and resistance to fading. The integrated solutions include software tools that provide coverage and spectrum optimization and ongoing network management. The group also offers network installation, integration, training and support services. The group has international operations in Asia-Pacific, Europe, Africa and the Middle East. On 23rd dec 2003, the group acquired proximity business from nortel networks.
