Business: The group's principal activity is to explore oil and gas. The activities are carried out through four segments: coal reclamation, carbon dioxide, China and e-commerce. Coal reclamation segment operates coal mines reclamation facilities and provides slurry pond core drilling services, fine coal laboratory analytical services and consulting services. Carbon dioxide segment produces carbon dioxide. China segment pursues environmental opportunities in China, focusing on the installation and construction of facilities, which utilize the patented airance compost systems(tm) composting technology. E-commerce segment develops Internet payment system and focuses on developing licensing agreements and other fee based agreements with companies implementing technology in conflict with the group's intellectual property. The group operates in the United States and China.
