

Business: The group's principal activities are to design, develop, manufacture and market complex electronic instruments and systems. The products of the group include integrated systems solutions, along with instruments and PC plug-in boards that can be used as system components or stand-alone solutions. These products are used to test, measure and analyze electrical, radio frequency, optical or physical properties. The products cater to the specialized needs of electronics manufacturers for high-performance production testing, process monitoring, product development and research. The customers of the group include engineers, technicians and scientists in a range of industries. The products of the group are sold in over 70 countries throughout the world. The group has sales offices located in Great Britain, Germany, France, the Netherlands, Italy, Japan, Belgium, Finland, Sweden, China, Korea, Taiwan, India and Singapore.
