Business: The group's principal activities are to develop, market and support advanced field programmable gate array semiconductors (fpga), embedded standard product (esp) and associated software tools. The group also licenses quickworks and quicktools design software and sell programming hardware. The products are based on vialink technology, user-programmable platform and the associated software tools used for system design. The vialink technology provides high security, low power and design efficiency. The user-programmable platform facilitates full utilization of a device's logic cells, clocks and input/output pins. Software tools enable customers to efficiently implement their designs using the group's products. The customers of the group include IBM, motorola, samsung, sony and honeywell. The products are sold through a network of sales managers, independent sales representatives and electronics distributors in North America, Europe and Asia.
